All:

Here are my notes from the impromptu meeting I just had with PersonOne and PersonTwo:

1. Continue our efforts to utilize Tableau as our graphing library on the Chicago market page
    1. *Supports business need for extensibility by non-development team members*
2. If we <u>can</u> have a fully working and tested Tableau solution this Sprint then push out the Chicago market page with <u>this</u> Sprint's release
3. If we <u>cannot</u> have a fully working and tested Tableau solution this Sprint then push the story back to <u>next</u> Sprint
4. Next Sprint we'll be adding ad support to the Chicago market page irregardless of whether or not this story is included in this Sprint
    1. *Supports business need to serve ads for the sales contract recently obtained by PersonThree*
5. Have an implementation available (complete or incomplete) for demo purposes in the Sprint review irregardless of whether or not this story is included in this Sprint.

If I have forgotten anything please let me know.

Thank you,
Nathan
